

James Kendall

Full Stack Dev

3376 Whippoorwill Dr.
Tallahassee, FL 32310

850-756-0277

dev@aigg.com

Skills

I write code and manage modern dev stacks. I like VSCode, Git, FastAPI, Vue, and Palanquin Dark.

I code well in Python and Javascript. I have certifications in Python, Node, Cryptography, etc. I am Linux native, and HTML / CSS are second nature to me.

My most successful personal projects: Headlin3s.com and AiBlog.com use a mix of Python and Node on the backend and Vue on the front. <https://aigg.blog/> is where one could read my thoughts about tech.

I like figuring out the best way to accomplish a task, and given the opportunity I will work on each task until there is nothing else I can do to improve it.

Experience

For the past 7+ years I have been an independent developer. I work white label for several regional agencies when their projects go beyond their internal abilities.

Before that I:

Co-Founded / CTO D2 Interactive

D2 became the biggest web dev company in Mississippi at the time. Responsible for six figure web projects for medium sized companies, universities, and organizations.

PHP, MySQL

Nikki Haley's Website

Created Nikki Haley's website when she ran for Governor and then her first site as Governor elect.

Design, PHP, HTML, CSS, JS

Habooble / Lead developer

Imagineered, developed, and deployed innovative custom web apps.

Design, PHP, HTML, CSS, JS

i-click Network / Primary Dev

Created and sold a banner advertising network. Responsible for all servers and code.

Perl, MySQL, HTML, CSS

e-WebCorp / Sys Admin

Networking administration, DBA, Multiple server administration.
RedHat certified.

RedHat, Apache, Perl
